Congratulations to Annabella Dean

On winning the Grail National best model in Lego Build a trunk competition.

So, Annabella is following her Dad John Dean who won the National G Scale best scratch model for 2017, Annabella took part in this competition at the Grail annual meeting at Nottingham and it is so good to see juniors enjoying this hobby.

Saturday 15 September – Lullingstone & Eynesford Railway open afternoon

Martin had a diesel day at his railway but again not many G scalers attended, but for those who did had a sunny afternoon and lots of running time. John Woollett had constructed a new battery-operated radio-controlled diesel a very nice runner and considering the running time it had motoring around the garden the batteries lasted all afternoon. Johns diesel is second blue engine in photo below. Also, I would like to thank Martin wife for the tea and cakes supplied all afternoon.
